

MLtools is included with the GL2000-/GL3000-/GL4000-/GL5300 series and with GL3400 and GL5450. It enables you to read out data from the connected data logger via USB, card reader, SSD readout station or server, as well as save it in a data logger directory structure.

MLtools makes it possible to provide a new measuring configuration in the respective data logger directory for the next read out process and automatically transfer it to the data logger.

Optionally, the software package MLcenter (vehicle management software) is also available which offers an already integrated MLmonitor and a synchronisation service.

Generate and manage vehicles

Defining of the vehicle specific data post processing (data conversion)

Integration of additional data processing programs

Configuration of network settings as well as long-distance data transmission
